Others in attendance:

Staff: Patrick Hammer

Call Meeting to Order at 7:10

1. Coal Creek Crossing Discussion – The group discussed the east/west trail connection south of the Coal Creek Crossing development. The group generally feels the trail alignment does not make sense and was designed without fully considering the impacts on the homes in Original Town or the environmental impacts within the Coal Creek riparian corridor. This discussion will be continued in January when all members are present. PROSTAC would also like to reevaluate the alignment of the north/south trail connection to the regional Mayhoffer-Single Tree trail. The Committee would like the developer to explore a connection further east of the original alignment moving the trail away from the existing Original Town properties and the Superior Self-Storage facility.
2. Committee member George Kupfner ask the other members of the group their opinions on re-zoning portions of the Town's open space to be used for agricultural grazing for cattle and/or horses. All agreed that additional information would be needed and feedback from OSAC should be collected before a decision could be made.
