1. Superior Town Center Civic Space – During the meeting of October 10, the Town Board asked PROSTAC to consider identifying amenities to eliminate within Superior Town Center Parks 1 and 2 in an effort to reduce the overall cost for the project. The Committee took this request into consideration, but currently feels cutting park costs isn't necessary until there is a better understanding of the Board's goals for all civic space within the Town Center, including future indoor space. The Committee would like the Board to establish a target budget for Parks 1 and 2 before they are asked to make cuts to amenities in the FDP design. This budget should take into account the known estimated costs for Parks 3 and 4 as well as the estimated cost for indoor civic space. As such, the Committee asked to review the indoor space presentation that was previously shown to the Board during the April Retreat. PROSTAC's purpose for reviewing the presentation was to get a better understanding of the amenities and potential costs associated with the indoor space in relation to parks and their potential costs. The indoor space shown in the presentation was approximately 40,000 square feet in size and costs \$220 per square foot (\$8.8 million). Staff informed the Committee upon viewing the presentation that the design and cost shown in the presentation were conceptual and should not be considered final.

2. Naming Process for New Park – The Committee members reviewed the most recent list of names submitted through the naming contest for the new park located next to Eldorado K-8 School. The Committee will continue to review the names as they are submitted, but have shown interest in the names below. The naming contest is still open for several more days – this item will be discussed at the November meeting.
